

Sanyam Rathore

+91-9752117992 | sanyamr.work@gmail.com | PORTFOLIO    

CAREER SUMMARY

Full-stack engineer with 4+ years of experience delivering high-quality, production-grade solutions that exceed client expectations. Specializes in building end-to-end applications, event-driven automations, and system integrations that deliver seamless user experiences. Proven ability to quickly master new technologies and deliver outside core stack when needed. Strong advocate for clean architecture, system design, and engineering best practices.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6), TypeScript, SQL, Python, C++
- **Frontend:** React, Next.js, TanStack Query, Redux, Tailwind CSS, HTML5, CSS3, Zustand, Context
- **Backend:** Node.js, Express.js, Nest, OAuth 2.0, JWT, Clerk, REST & GraphQL, LLM-based tool Integration
- **Databases:** PostgreSQL, MongoDB, Prisma, Redis/BullMQ
- **Performance & a11y:** Core Web Vitals, code splitting, windowing, WCAG-aligned accessible components
- **Testing & Quality:** Vitest, Unit & Integration testing, Code Review Standards
- **Tooling & DevOps:** Git/GitHub, AWS (*Lambda*, REST API gateway, *CloudWatch*, *S3*, *EC2*), Azure (*Functions*, *VM*, *ACI*)
- **Practices:** Prompt Engineering, AI-assisted development, Agile/Scrum, Figma-to-UI Implementations, Mentoring

PROFESSIONAL EXPERIENCE

Freelance | Remote

5 months

Full Stack Developer

April 2026 – Present

- Built and deployed a finance analytics **SaaS** dashboard using Next.js, TypeScript, Node.js, and PostgreSQL, enabling visualization of revenue, expenses, transactions, and investment trends via interactive charts and data-driven dashboards.

Alignerr | Freelance – Remote

5 months

Senior Software Engineer

April 2026 - Present

- Engineered structured technical prompts and evaluated long-horizon full-stack code generation outputs for architectural soundness and reasoning integrity, supporting **RLHF**-based model alignment.

CloudEQ | Chandigarh, India

3 yrs 4 months

Software Engineer II (Hybrid)

Jan 2023 – April 2026

- Architected a fault-tolerant, event-driven automation platform on Salesforce CDC – stateless **Node.js** ingestion layer, **Redis/BullMQ** queue partitioned by opportunity_id, and **MongoDB**-backed Saga Orchestrator.
- Implemented compensating transactions, idempotency guards, exponential-backoff retries and **human-in-the-loop** Jira approval gates – cutting project intake overhead by **75%** and achieved **99% reliability** with zero data loss and zero duplicate resource creation across **500+** events.
- Integrated MS Graph API to automate Teams channel creation and SharePoint file migration of **2,000+ documents**, improving cross-platform collaboration efficiency by **40%**.
- Led frontend architecture for a client-facing project-tracking dashboard; ran requirement-gathering sessions with designers and stakeholders, then translated Figma designs into a custom high-performance **React/TypeScript** data table (no external library) featuring fixed + scrollable columns, expandable multi-level rows, multi-range date comparisons, and windowed/virtualized loading for large datasets.
- Collaborated within Agile/Scrum delivery cycles, utilizing structured team **Git** workflows for branching and code.
- Mentored junior engineers on engineering standards; drove adoption of **Vitest** unit/integration testing across services to raise code quality.
- Built event-triggered **AWS Lambda** integrations in Node.js between HALO ITSM ↔ Jira and ServiceNow ↔ Jira, accelerating ticket resolution by **25%** and eliminating **~80%** of manual ticket synchronization.
- Developed and published enterprise Power Apps Canvas applications with custom **PCF React/TypeScript** components, including multi-screen navigation, Microsoft user integration, and input/output bindings; Improved Power Apps deployment safety by introducing solution-version rollback workflows; Optimized initial-load performance through centralized CSS loading.

- Optimized a custom Resource & Project Management UI, reducing page load time by **800ms**, improving Core Web Vitals, and driving a **10% increase** in user engagement.

InfoHub Innovations – Mumbai, India (*Remote*)

4 months

Software Engineer I

Sept 2022 – Dec 2022

- Engineered secure **Node.js** backend services with **OAuth 2.0** and automated CMS data ingestion for **4,000+ monthly articles**, reducing data errors by **60%**, while refactoring the **React.js** frontend to improve LCP by **10%** and CLS from **0.23 to 0.12**.

Persistent Systems – Nagpur, India (*Remote*)

9 months

Software Developer (6-month Intern → FTE)

Dec 2021 – Aug 2022

- Maintained **IBM Netezza** data-warehouse appliances using `nzcli/nzsql`; monitored SPU, debugged SQL workloads, and containerized workflows with **Docker** in large-scale analytical database environments.

PROJECTS

react-finance-grid — (*Personal Project*)

[Link ↗](#)

- Built a modular reusable **React data-grid library** for financial workflows tabular architecture, supporting pinned columns, drag-and-drop column ordering, column highlighting, async expansion, and sticky grand totals.
- Implemented **virtualized rendering** and optimized layout logic to keep large datasets responsive while preserving fixed-column behavior and horizontal scrolling.
- Built an accessible column menu (sort, pin, hide, highlight, resize) and packaged the library for distribution with ESM/CJS builds, TypeScript declarations, CSS export and tests.

StreamSync — *Real time video sharing SaaS* — (*Personal Project*)

- Designing a full-stack desktop application for real-time video sharing, featuring low-latency streaming via Socket.io and global distribution with **AWS CloudFront**.
- Integrated **Whisper AI** to generate titles, descriptions, and transcripts from video.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

Aug 2018 – June 2022

Lakshmi Narain College of Technology – Bhopal, India

GPA: **8.57**

CERTIFICATIONS & BADGES

- MongoDB Overview: Core Concepts and Architecture - [Link ↗](#)
- Microsoft Certified: Azure Fundamentals - AZ-900 - [Link ↗](#)
- Power Platform Developer Associate - PL-400
