

Sanyam Rathore

Full Stack Developer |    |

+91-9752117992 | sanyam.12rathore@gmail.com | [PORTFOLIO](#)

CAREER SUMMARY

Dynamic, results-oriented Software Developer with 4 years of hands-on experience architecting, developing, and optimizing, scalable web apps and distributed systems in cloud-centric environments across diverse business domains. Consistently deliver high-performance, fault-tolerant solutions that handle large-scale data, automate workflows (cutting manual work by 80%), and boosting system performance by 30%. Recognized for translating business needs into practical solutions, driving engineering excellence, and achieving measurable results through problem-solving and collaboration.

SKILLS AND STRENGTHS

- **Backend/Databases:** Node.js, Express, PostgreSQL, MongoDB, Prisma, REST, Neon, PM2
- **Frontend & Frameworks:** React.js, Next.js, Redux, Bootstrap, Shadcn UI, Responsiveness
- **Cloud:** AWS (*API gateway, Lambda, CloudWatch*), Azure (*function apps, VM, ACI*)
- **Authorization:** OAuth, JWT Token-Based
- **Programming Languages:** TypeScript, JavaScript, Python, HTML5, CSS3
- **Core CS Concepts:** DSA, OOPs, System Design, Cloud Architecture
- **Tools & Platforms:** CMS, Dashboards, Cursor AI, Salesforce, ServiceNow, Jira
- **Dev Practices:** Agile Methodologies, Quality Assurance, Cross-functional Collaboration.
- **Languages:** Hindi (*native*), English (*fluent*)

PROFESSIONAL EXPERIENCE

CloudEQ – Chandigarh, India (*Hybrid*) – 3 years

Software Engineer II

August 2025 – Present | 6 month

- Architected and deployed an enterprise-grade event-driven automation platform utilizing **Salesforce CDC, MongoDB Change Streams, Node.js**, and **Azure infrastructure (VM/ACI)**, implementing producer-consumer microservices (event receiver + background worker) that orchestrated real-time data synchronization across **5+ enterprise systems** (Salesforce, Jira, Microsoft Teams, SharePoint) processing **500+ business-critical events monthly**, eliminating manual project intake workflows and reducing operational overhead by **75%**.
- Engineered **fault-tolerant distributed system** with MongoDB-backed event queue, implementing **retry logic (3-attempt strategy)**, error handling middleware, and **manual review flagging**, achieving **99.5% event processing reliability** and zero data loss while processing asynchronous workflows across multiple external APIs with variable latency.
- Integrated **Microsoft Graph API** for automated orchestration of **Teams channel creation, file migration (2,000+ documents), and chat archival** to SharePoint libraries, implementing

recursive file copying and chat transcript export that improved cross-platform collaboration efficiency by **40%** and ensured complete audit trails for client projects.

- Led the end-to-end rollout of a resilient **AWS Lambda-based (Node.js)** integration between **HALO ↔ Jira ITSM** using event-triggered AWS REST Apis, enhancing data reliability and system uptime while accelerating ticket resolution by 25% and cutting manual syncs by 80%.

Software Engineer I

January 2023 – August 2025 | 2 yrs 7 months

- Build the end-to-end rollout of a resilient **AWS Lambda-based (Node.js)** integration between **ServiceNow ↔ Jira ITSM** using event-triggered AWS REST Apis, enhancing data reliability and system uptime while accelerating ticket resolution by 25% and cutting manual syncs by 80%.
- Secured and optimized distributed services by developing **RESTful APIs** with **token-based authentication**, middleware-based input validation, and layered retry/error handling mechanism boosting system reliability.
- Integrated **Microsoft Graph API** for automate handling of calendar events, email syncing, and team/channel data, increasing cross-functional collaboration efficiency by 30% across 20+ projects teams.
- Delivered high-fidelity UIs under tight deadlines while solving layout and responsiveness for a custom Resource & Project Management System using **React (TypeScript)**, achieving a 10% improvement in user engagement, reducing page load by **800ms** and improved Core Web Vitals by optimizing frontend performance.
- Engineered a scalable web application using **React.js, TypeScript, Node.js**, and **Express.js**, secured with Azure Cloud Access integration, implementing SSO authentication for 450+ enterprise users by combining Azure AD and **OAuth2** middleware; achieved a 15% improvement in deployment velocity and up-time, surpassing key performance KPIs.

InfoHub Innovations – Mumbai, India (Remote) – 5 months

Software Engineer I

August 2022 – December 2022 | 5 months

- Engineered secure **Node.js** backends with **OAuth 2.0**, resulting in improved access control for sensitive business processes.
- Automated CMS data ingestion (5,000+ articles/month), resolving data duplication, cutting errors by 60%, and ensuring consistent, high-quality data pipelines with checksum validation.
- Refactored **React.js** frontend, improving LCP by 20% and CLS from 0.23 to 0.12, directly contributing to higher SEO ranking and user retention.

Persistent System – Nagpur, India (Remote) – 8 months

Software Developer (Intern + Full time)

December 2021 – August 2022 | 6 months Internship | 2 months FTE

- Built responsive UI components using **React.js**, contributing to enterprise dashboards.

- Collaborated with Agile teams to deliver feature enhancements, reduce render bottlenecks, and improve accessibility and UX in client-facing applications.

PERSONAL PROJECTS

StreamSync (Real time video sharing)

(currently working - Idea is to learn new tech stack and upskill myself)

Next, Electron, Express.js, Socket.io, AWS CloudFront, PostgreSQL, Prisma, Tailwind CSS, Clerk

- Developing a full-stack AI-powered SaaS platform for real-time video sharing with a cross-platform desktop application.
- Implementing low-latency video streaming & comms via Socket.io/Express.js enabling smooth sync sharing b/w users.
- Will deploy static and dynamic content delivery using AWS CloudFront, ensuring fast global distribution of video streaming and content availability.

CERTIFICATES

- Microsoft Certified: Azure Fundamentals - **AZ-900**
- Power Platform Developer Associate - **PL-400**
- Crash Course on **Python** - Coursera
- Learning **Kubernetes** - LinkedIn
- **PostgreSQL** Fundamentals - AWS
- Programming, **DSA** using Python - NPTEL
- Responsive **web design** - freecodecamp
- Effective Communication in the Workplace - DeakinCo.

EDUCATION

Lakshmi Narain College of Technology – Bhopal, India

August 2018 – June 2022

Bachelor of Technology, Computer Science and Engineering

GPA Grad: 8.57/10

Activities: - Quiz Competition, Table Tennis, Football Team, Robotics (Robot-Fight)
