CAREER SUMMARY

Dynamic, results-oriented Software Engineer with +3.5 years of hands-on experience architecting, developing, and optimizing, scalable web applications and distributed systems in cloud-centric environments across diverse business domains. Demonstrates skills in both frontend and backend development. Consistently deliver high-performance, fault-tolerant solutions that handle large-scale data, automate workflows (cutting manual work by ~80%).

SKILLS AND STRENGTHS

- **Programming Languages:** **TypeScript**, JavaScript, Python, HTML5, CSS3
- **Backend & Databases:** **Node.js**, Express.js, MongoDB, **RESTful API**, pm2
- **Frontend & Frameworks:** **React.js**, Next.js, Redux, Bootstrap, Shadcn UI
- **Cloud:** AWS (**API gateway**, **Lambda**, **CloudWatch**), Azure (*function apps*, **VM**, **ACI**)
- **Core CS Concepts:** Data Structure & Algorithm, Object Oriented Programming, System Design Basics
- **Development Practices:** Agile Methodologies, Cross-functional Collaboration (UX, Backend)
- **Tools & Platforms:** CMS, Cursor AI, Salesforce, ServiceNow, Jira

PROFESSIONAL EXPERIENCE

CloudEQ – Chandigarh, India (*hybrid*) – 2.8 years

Software Engineer II

August 2025 – Present | 1 month

- Architected and developed a real-time data integration system utilizing **Node.js**, **MongoDB**, **Salesforce Change Data Capture**, **Virtual Machine** and **Azure Container Instances**, implementing event-driven microservices (event receiver & background worker) that reduced manual interventions by 70% to 80% and improved data processing efficiency for over 200 daily transactions.
- Deployed scalable integration on VM instances, orchestrating server processes with **pm2** for robust reliability and streamlined operations.

Software Engineer I

January 2023 – August 2025 | 2 yrs 8 months

- Accelerated ticket resolution by 25% and reduced manual syncs by 80% by leading the rollout of a fault-tolerant bi-directional synchronization layer (**ServiceNow ↔ Jira system**), with a focus on data consistency and failover handling through orchestration of AWS Lambda and API Gateway.

- Integrated **Microsoft Graph API** for automate handling of calendar events, email syncing, and team/channel data, increasing cross-functional collaboration efficiency by 30% across 20+ projects teams.
- Delivered high-fidelity UIs under tight deadlines while solving layout and responsiveness for a custom Resource & Project Management System using **React (TypeScript)**, achieving a 10% improvement in user engagement.
- Reduced page load by **800ms** and improved Core Web Vitals by optimizing frontend performance for enterprise-scale React applications.

InfoHub Innovations – Mumbai, India (*remote*) – 7 months

Software Engineer I

June 2022 – December 2022 | 7 months

- Engineered secure Node.js backends with **OAuth 2.0**, resulting in improved access control for sensitive business processes.
- Refactored **React.js** frontend, improving LCP by 20% and CLS from 0.23 to 0.12, directly contributing to higher SEO ranking and user retention.

Persistent System – Nagpur, India (*Remote*) – 8 months

Software Developer (*Intern + Full time*)

December 2021 – August 2022 | 8 months

- Built responsive UI components using **React.js**, contributing to enterprise dashboards.
- Collaborated with Agile teams to deliver feature enhancements, reduce render bottlenecks, and improve accessibility and UX in client-facing applications.

CERTIFICATES & ACHIEVEMENTS

- Microsoft Certified: Azure Fundamentals **AZ-900**
- Power Platform Developer Associate **PL-400**
- Crash Course on **Python** - Coursera
- **PostgreSQL** Fundamentals by AWS
- Programming, **DSA** using Python by NPTEL
- Responsive web design freecodecamp

EDUCATION

Lakshmi Narain College of Technology, Bhopal (08/2018 – 06/2022)

Bachelor of Technology, Computer Science and Engineering

GPA Grad: 8.57/10

Activities: - Quiz Competition, Table Tennis, Football Team, Robotics (Robot-Fight)
