CAREER SUMMARY

Dynamic, results-oriented Software Engineer with +3.5 years of hands-on experience architecting, developing, and optimizing robust, scalable web applications and distributed systems in cloud-centric environments across diverse business domains. Demonstrates advanced skills in both frontend and backend development, underpinned by a strong foundation in core computer science concepts including data structures, algorithms, and system design. Consistently deliver high-performance, fault-tolerant solutions that handle large-scale data, automate workflows (cutting manual work by 80%), and boosting system performance by 30%. Recognized for translating business needs into practical solutions, driving engineering excellence, and achieving measurable results through strong problem-solving and collaboration.

SKILLS AND STRENGTHS

- **Backend & Databases:** Node.js, Express.js, PostgreSQL, MongoDB, Prisma ORM, RESTful API, Neon, pm2
- **Frontend & Frameworks:** React.js, Next.js, Redux, Bootstrap, Shadcn UI, Responsiveness
- **Cloud:** AWS (*API gateway, Lambda, CloudWatch*), Azure (*function apps, VM, ACI*)
- **Authorization & Real-Time:** Clerk (SSO/OAuth), Socket.io, Token-Based APIs
- **Programming Languages:** TypeScript, JavaScript, Python, HTML5, CSS3
- **Core CS Concepts:** Data Structure & Algorithm, Object Oriented Programming, System Design, Cloud Architecture
- **Development Practices:** Agile Methodologies, Quality Assurance, Cross-functional Collaboration (UX, Backend)
- **Tools & Platforms:** CMS, Dashboards, Cursor AI, Salesforce, ServiceNow, Jira
- **Languages:** Hindi (*native*), English (*fluent*)

PROFESSIONAL EXPERIENCE

CloudEQ – Chandigarh, India (*hybrid*) – 2.8 years

Software Engineer II

August 2025 – Present | 1 month

- Architected and developed a real-time data integration system utilizing **Node.js**, **MongoDB**, **Salesforce Change Data Capture**, and **Azure Container Instances**, implementing event-driven microservices (event receiver, background worker) that reduced manual interventions by 70% and improved data processing efficiency for over 2,000 daily transactions.
- Deployed scalable integration on VM instances, orchestrating server processes with **pm2** for robust reliability and streamlined operations.

Software Engineer I

January 2023 – August 2025 | 2 yrs 8 months

- Accelerated ticket resolution by 25% and cut manual syncs by 80% by leading/building the rollout with fault-tolerant of a bi-directional synchronization layer (**ServiceNow ↔ Jira system**) focused on data consistency and failover handling.
- Secured and optimized distributed services by developing **RESTful APIs** with **token-based authentication**, middleware-based input validation, and layered retry/error handling mechanism boosting system reliability.
- Integrated **Microsoft Graph API** for automate handling of calendar events, email syncing, and team/channel data, increasing cross-functional collaboration efficiency by 30% across 20+ projects teams.
- Engineered a scalable web application using **React.js**, **TypeScript**, Node.js, and Express.js, secured with Azure Cloud Access integration, implementing SSO authentication for 450+ enterprise users by combining Azure AD and OAuth2 middleware; achieved a 15% improvement in deployment velocity and uptime, surpassing key performance KPIs.
- Delivered high-fidelity UIs under tight deadlines while solving layout and responsiveness for a custom Resource & Project Management System using **React (TypeScript)**, achieving a 10% improvement in user engagement.
- Reduced page load by **800ms** and improved Core Web Vitals by optimizing frontend performance for enterprise-scale React applications.

InfoHub Innovations – Mumbai, India (*remote*) – 7 months

Software Engineer I

June 2022 – December 2022 | 7 months

- Engineered secure Node.js backends with **OAuth 2.0**, resulting in improved access control for sensitive business processes.
- Automated CMS data ingestion (5,000+ articles/month), resolving data duplication, cutting errors by 60%, and ensuring consistent, high-quality data pipelines with checksum validation.
- Refactored **React.js** frontend, improving LCP by 20% and CLS from 0.23 to 0.12, directly contributing to higher SEO ranking and user retention.

Persistent System – Nagpur, India (*Remote*) – 8 months

Software Developer (*Intern + Full time*)

December 2021 – August 2022 | 8 months

- Built responsive UI components using **React.js**, contributing to enterprise dashboards.
- Collaborated with Agile teams to deliver feature enhancements, reduce render bottlenecks, and improve accessibility and UX in client-facing applications.
- Managed containerized applications by creating Docker images, optimizing them for size and security, and pushing them to container registries.

- Optimized database performance by implementing indexing, partitioning, and query optimization strategies in accordance with Netezza best practices.

PERSONAL PROJECTS

REVINTRO. (*Unified platform for Movies, Books & Reviews*)

Next.js, PostgreSQL, Prisma, Tailwind CSS

- Built a full-stack web app combining IMDb and Goodreads features, enabling users to discover, review, and rate both movies and books on a single platform.
- Implemented user auth (for personalized watchlists/read lists), designed with a scalable PostgreSQL database using Prisma ORM and integrated TMDB API and Google Books API for real-time content retrieval.

StreamSync (*Real time video sharing*)

Next, Electron, Express.js, Socket.io, AWS CloudFront, PostgreSQL, Prisma, Tailwind CSS, Clerk

- Developed a full-stack AI-powered SaaS platform for real-time video sharing with a cross-platform desktop application.
- Implemented low-latency video streaming & comms via Socket.io/Express.js enabling smooth sync sharing b/w users.
- Deployed static and dynamic content delivery using AWS CloudFront, ensuring fast globally distributed video streaming and content availability.

CERTIFICATES & ACHIEVEMENTS

- Microsoft Certified: Azure Fundamentals **AZ-900**
- Power Platform Developer Associate **PL-400**
- Crash Course on **Python** - Coursera
- Learning **Kubernetes** LinkedIn
- **PostgreSQL** Fundamentals by AWS
- Programming, **DSA** using Python by NPTEL
- Responsive web design freecodecamp
- Effective Communication in the Workplace by DeakinCo.

EDUCATION

Lakshmi Narain College of Technology, Bhopal (08/2018 – 06/2022)

Bachelor of Technology, Computer Science and Engineering

GPA Grad: 8.57/10

Activities: - Quiz Competition, Table Tennis, Football Team, Robotics (Robot-Fight)
